Hide your flat panel after use!

Hide any flat panel with the Audipack vertical ceiling lift systems.

Available for any size of flat panel.

Audipack®

It's great to have solutions...

You'll be **amazed** the first time

you see this!

Shown model is a 103" ceiling lift.

Available 103" models:

P3940 (vertical lift)

P5140 (vertical lift and tilt!)

- ▲ **Hidden comfort**
- ▲ **Optional rotation and electric ceiling hatch**
- ▲ **Available for any size of screen**
- ▲ **Very slim finishing**
- ▲ **Anti drop safety device**

Our high quality, silent and durable vertical ceiling lift systems lower a flat panel from above the ceiling.

Our high quality, silent and durable vertical ceiling lift systems lower a flat panel from above the ceiling.

The lift is equipped as standard with a dropdown safety device and ceiling finishing kit. The low voltage motors mean the lift is silent and the high quality components result in a durable, reliable and low maintenance system.

A ceiling hatch that opens before the flat panel is lowered is available as an option, as well as electric rotation and inclination of the panel (see price list).

The system can be custom made for any screen size

To control the system other than relais contact, please select the below list remote controls.

Ref. 260214 (Internal IR remote control set, for lift + hatch)

Ref. 260215 (Internal RF remote control set, for lift + hatch)

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

See "Mounting brackets for flat panels" section on page 43 for an overview of the available brackets.

VERTICAL LIFT SYSTEMS

Power supply: **230 VAC 50-60 Hz/24 VDC**
